ABOUT ME

Having experience as a Front End Developer, I have experience an internship for 5 months at the Ministry of Education, Culture, Research and Technology of the Republic of Indonesia, Directorate General of Higher Education and 6 months at PT Telekomunikasi Indonesia, Tbk. In both positions, I developed web applications using JavaScript and the Next.js framework, and worked closely with teams to solve complex technical problems. I am always eager to continue learning and mastering new technologies to improve my abilities.

I am not only focused on web development, but also interested in further exploration of technology and innovation in this field. After obtaining a Bachelor's degree in Informatics in 2024, I am now ready to contribute further to a company that has the same vision to grow together, innovate and have a good impact on each other.
